

DYNAMIC BALANCING MACHINE FOR AGRICULTURE

VTM
GROUP

We make balancing easier

- Manufacturing of balancing machines for various workpieces of all types and sizes.
- Equipment and tooling are offered only in accordance with specifics of your business.
- Training of personnel to working skills on the machine.
- Commissioning and adjustment works at the customer's location.

BALANCING MACHINE

9D716 / 9D717

for wide range of rotors weighing up to 500 kg.

Reliable

- Hard bearing design for balancing rotors with large initial unbalances
- Low speed safety balancing
- Frequency inverter drive provides reliable protection for all electrical equipment

Simple & user friendly

- Ease of use and simple operation
- Advanced digital measuring system - shorter time spent on balancing, resource saving
- Variable speed control of the rotor and smooth acceleration

Universal

- Cardan and belt drive
- Machine bed up to 12 meters long
- Any rotor of unusual configuration with short bearing journals can be balanced.

Accuracy

- High accuracy rollers assembled on precision bearings
- New advanced digital measuring system with a wide range of functions
- Free from the influence of external vibration factors

**Our machines make your
business more profitable!**
